

Front-end React developer, Back-end Development student and entrepreneur. I am looking for my first job in technology.

I started out as a gastronomic professional working in kitchens of all kinds: from a small sushi place in Mar del Plata to Michelin star restaurants in Spain. The different skills acquired materialized in two ventures in my hometown and with them I discovered a new passion for technology and how it works. I am currently studying Back-end, working with NODE JS, EXPRESS, MONGO DB, API REST.

I consider myself a detail-oriented person, flexible to prioritize deliverables according to business requirements, adaptable to change. I enjoy teamwork to learn and enhance my professional development.

Personal Information

23 Marzo de 1995 (26 años) (Mar del Plata, Bs. As., Argentina)

Address: Mar del Plata, Bs. As., Argentina

Mobile Phone: +54 9 223 545 7950
